

# COVID-19: February Vaccine Distribution Information from the Wyoming Department of Health

February 4, 2021

Limited COVID-19 vaccine became available to states on December 12, 2020. The Wyoming Department of Health (WDH) anticipates the following allocation of vaccine across the state for February 2021 based on estimates provided by the Centers for Disease Control and Prevention (CDC) and Operation Warp Speed (OWS). Vaccine allocations will be shipped to county public health agencies or in some instances to hospitals and other providers to administer to populations identified in Phase 1a and 1b together with their local partners.

Estimated amounts of vaccine to be sent to counties in February are listed in the table. Listed amounts are for 1st dose only. **These amounts are tentative at this time and may change.**

## Tentative County Distribution Schedule - Subject to change based on vaccine availability

Anticipated week of delivery	2-1	2-1	2-8	2-8	2-15	2-15	2-22	2-22	Total in Feb.	Total vaccine expected in Jan.	Total vaccine received in Dec.
Vaccine Type	Pfizer	Moderna	Pfizer	Moderna	Pfizer	Moderna	Pfizer	Moderna			
Albany		500		600		500		500	2,100	1,000	1,200
Big Horn		200		300		200		300	1,000	600	700

Weston		100		200		200		200	700	400	300
Totals	3,900	4,800	6,825	5,300	3,900	5,300	3,900	5,300	39,225	25,900	21,300

A 30% increase in Moderna doses is expected for February and included in the table on page 1, this is an approximate 16% increase in doses overall. Additionally, with the use of specific syringes, 6 doses of the Pfizer vaccine can be administered from each vial of vaccine. CDC is ensuring that ancillary supplies provided with the Pfizer vaccine will reliably result in being able to draw a 6th dose. Even though Pfizer deliveries are noted above as 975 doses, each of the deliveries will yield approximately 1,170 doses rather than 975.

Changes in expected quantities will be communicated and updated in future versions of this document. More details regarding ordering and shipping dates will also be provided to county partners who receive direct vaccine shipments.

Second dose shipments are sent to each facility that received 1st dose shipments. Second doses shipments are not included in the table above.

- Pfizer vaccine is ordered and shipped approximately two weeks after the initial shipment of vaccine.
- Moderna vaccine is ordered and shipped approximately three weeks after the initial shipment of vaccine.

Received and expected statewide second dose orders through February:

Anticipated week of delivery	12-28	1-4	1-11	1-18	1-25	2-4	2-11	2-18	2-25
Pfizer- 2nd dose	4,875	1,950	975	975	2,925	3,900	3,900	3,900	3,900
Moderna- 2nd dose			10,000	3,500	3,500	3,500	3,700	3,700	3,700

Additional vaccine is allocated for Wyoming as part of the Federal Pharmacy Partners for Long-Term Care Program. This program ensures Walgreens and CVS pharmacies across the country will provide COVID-19 vaccinations to residents and staff of enrolled long-term care facilities and assisted living facilities within 75 miles of the pharmacy. To date, 9,750 doses of Pfizer vaccine have been allocated to this program in Wyoming. WDH has worked with county partners to ensure vaccination coverage for facilities that did not enroll or were too far from the pharmacies for the federal program. Three clinics will be scheduled at each facility enrolled with Walgreens and CVS. Clinics will occur January-March 2021.
